

Mobile Donations - February 2008

Bucks. Net

Bucks. Net is a technology company and e-payments gateway (processing donations in a similar way to PayPal or World Pay) that facilitates donations via mobile phones. Unlike other mobile phone donation mechanisms, this initiative does not involve a telephone call. Instead, use is made of the Mobile Internet capability of modern phones.

Donating online via mobile phones enables donors to act instantly and make real-time donations. These donations can be made by debit or credit card, either as a one-off gift or a recurring payment, directly to the charity.

This donation mechanism does not require donors to pre-register and uses the highest levels of encryption which match internet security standards.

Details of the scheme and how it works are available in the [summary report](#). Signed-in Organisational members of the Institute can also download the [full report](#) which includes the panel's conclusions - remember to sign-in first, before clicking the link.
